FARLAND'S PATENT BANJO HEAD

Positively not affected by moisture. Practically non-stretching. Gives the banjo a louder, more sustained tone than calfskin or any kind of vellum and the tone is always the same, rain or shine.

PRICE $5.00. GUARANTEED FOR 5 YEARS, as below

—Perfected by—

MR. ALFRED A. FARLAND

PHENOMENAL BANJOIST

Farland Wood Rim Banjos Are Best

No Other Banjo Sounds as Good

PATENTS PENDING IN ALL ENGLISH SPEAKING COUNTRIES

DIRECTIONS: Place the hoop over the head and put on the rim so the bridge will rest within the square marked "Bridge." When the nuts begin to turn hard turn each one a VERY little at a time and go around the rim as many times as necessary. The head will be tight enough when your banjo sounds better than it did with a vellum head.

GUARANTEE: Should this head fail to stand an EVENLY distributed strain, great enough to give a BETTER tone than vellum, for 5 years from ....., 19....., it will be replaced free, if returned to the maker.

USE FARLAND'S SPECIAL BRIDGE AND HEAVY GUAGE STRINGS FOR BEST RESULTS WITH THIS HEAD
